Data, digital and IT apprenticeships offer businesses and employees invaluable opportunities to establish a robust foundation of skills and knowledge in this ever-evolving sector.

» Our apprenticeship offer

Empower your workforce with our cutting-edge data, digital, and IT apprenticeship programmes, meticulously crafted to unlock untapped potential and propel success in today's dynamic sector. In an era of relentless technological advancement, businesses and individuals alike acknowledge the imperative of continuously enhancing their capabilities to remain competitive. Our immersive apprenticeships offer unparalleled opportunities to cultivate expertise in this pivotal sector, enabling both individuals and their organisations to flourish amid the rapid evolution of technology.

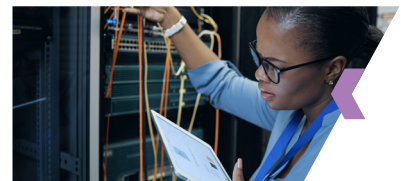

Content Creator Level 3

Participants in this programme create compelling written and audio-visual content across media channels, aligning brand strategies and audience preferences, while working within specified briefs and conducting research to optimise audience engagement and meet evolving brand and customer needs.

Data Analyst Level 4

This programme is tailored for professionals managing multiple projects and delivering technical data solutions. They analyse data, offer actionable insights for business enhancement, and demonstrate expertise in data structures, database systems, and analytical tools, ensuring excellence in their roles.

Data Technician Level 3

Our training programme equips individuals to source, format, and present data securely for analysis, analysing both structured and unstructured data to drive business outcomes, while integrating diverse data sources and maintaining legal and ethical standards in team settings, whether in-office or virtual.

Digital Support Technician Level 3

This specialised programme is crafted for data, digital, and IT professionals seeking to maximise technology's impact within organisations. Participants will develop skills to drive adaptation to technological changes and ensure operational efficiency for enhanced organisational performance.

Information Communication Technician Level 3

Focused on digital professionals, this training programme sharpens skills in efficiently managing IT and telecommunications infrastructure. Specialised roles include networking, server management, IT essentials, secure communications, programming, and database administration.

Multi-Channel Marketer Level 3

Tailored for marketing professionals, this programme focuses on individuals within marketing teams tasked with executing multi-channel marketing strategies. Participants oversee daily marketing activities across various platforms and systems crucial for the company's marketing operations.

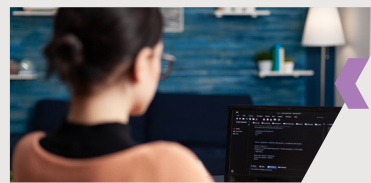

Software Developer Level 4

Tailored for innovators in computer programming, our comprehensive programme guides individuals through the entire software lifecycle, from research and development to product retirement. Whether working independently or within teams, participants play a crucial role in driving innovation and often collaborate closely with senior team members to achieve project objectives.

Software Development Technician Level 3

Geared towards IT, software, and digital sector entrants, our programme emphasises their role as integral team members in software development. Participants learn to construct basic software components like web, mobile, or desktop applications for integration into larger projects or direct use by end-users. With guidance, they interpret straightforward design specifications to effectively contribute to project components.

Software Tester Level 4

Tailored for data, digital, and IT professionals, this programme ensures smooth software functionality within development frameworks. Participants uphold high software quality standards, manage deployment, and align closely with client needs and organisational guidelines. This role involves mainly office-based or remote work, with occasional client site visits for consultation.

” Turning Point joined forces with Learning Curve Group in early 2023, initially pursuing Level 2 Short Course qualifications. Seamlessly transitioning to Learning Curve Group's apprenticeship programmes, our journey has been marked by professionalism and support, ensuring uninterrupted progress for all involved. From developing bespoke apprenticeships to witnessing positive feedback from our colleagues, our collaboration has been truly rewarding.

Apprenticeships for employers

At Learning Curve Group, we specialise in delivering successful apprenticeships. Whether you want to upskill your employees or bring in enthusiastic new starters, an apprenticeship can be the right option for your business's future.

What do Apprenticeships include?

Each apprenticeship programme is structured around a specific 'Standard' corresponding to a particular occupation. These standards are robust, demanding, and typically involve at least one year of intensive training, culminating in an End-Point Assessment (EPA) to evaluate the apprentice's competency.

Furthermore, many of our data, digital and IT apprenticeships come with additional benefits. These may include relevant licenses or professional qualifications integrated seamlessly into the programme curriculum, all provided at no extra cost to the apprentice.

Benefits to Apprenticeships

Apprenticeships offer mutual benefits for businesses and individuals. For businesses, they provide a cost-effective means to attract and retain talent, customise training, and develop a skilled workforce. Meanwhile, individuals gain hands-on experience, recognised qualifications, and opportunities for personal and professional growth.
